 **i key** *User Manual*

Chapter 1: Please follow these steps below.

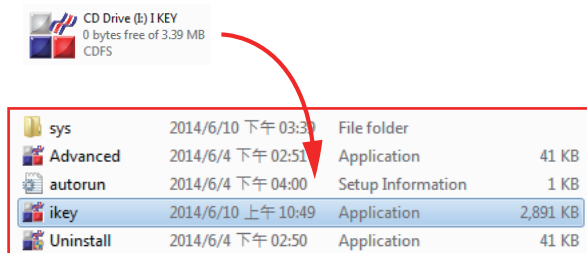

<1>

Once you plugged in, Windows will install the drivers for it automatically. The Autoplay window displays when inserting iKey.

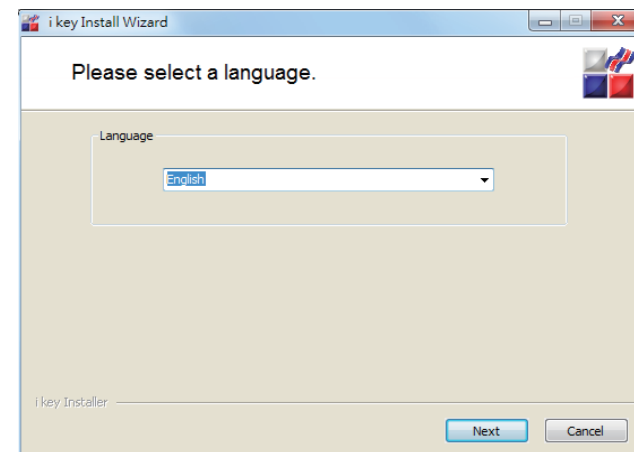

<2>

When the dialogue box appears, please select "ikey.exe" to perform. If it doesn't, select "My Computer" from the Start menu. When the window appears, double click "ikey.exe" to open the drive. Click "Yes" to continue when the Security Warning window displays.

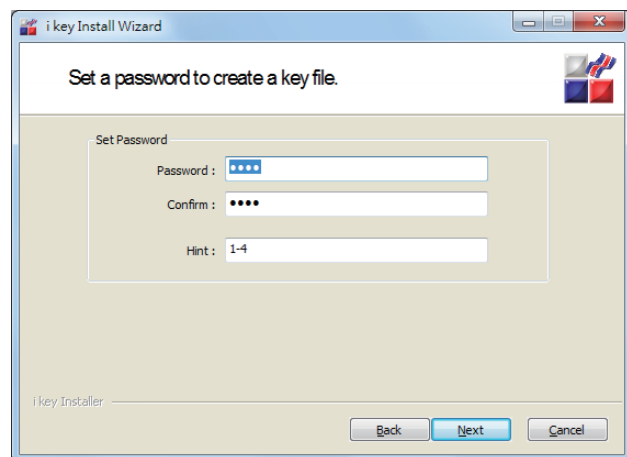

<3>

Select a display language then click "Next" to continue reading the end user license agreement, and then click "Next."

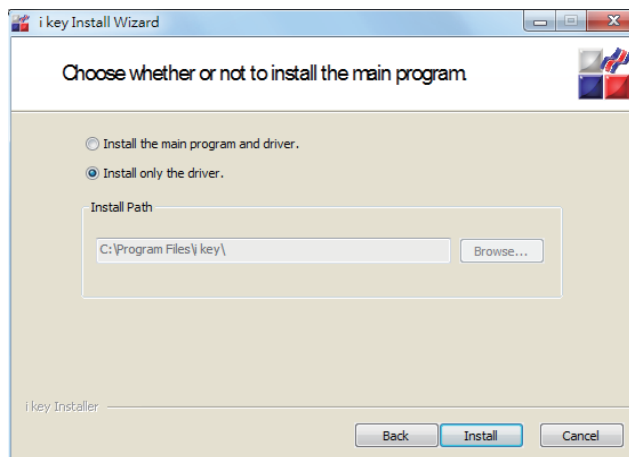

<4>

If this is your first time with iKey, you will need to create a password. Click "Next" to continue.

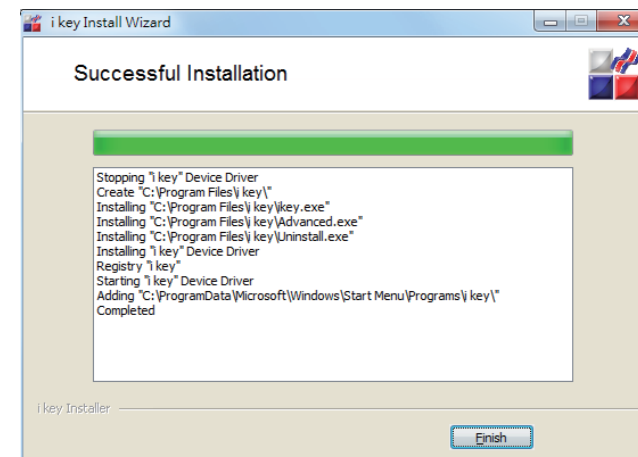

<5>

Choose an item to install. You can install either the main program or secret room driver. Choose to install the secret room driver will let iKey be the only way to open your files. Click "Install" to continue.

<6>

Click "Finished" to complete the installation. System will activate "MOSDAN iKey" main menu automatically.

| Chapter 2: Introducing User Interfaces |

<1>

Secret room displays while inserting "iKey" or you can click "My Computer" icon to find it. When the window appears, double click "iKey.exe" .
